A: I think you want to delete the out put array and just keep the lines that match the pattern? like this: string fileName = Path.GetFileName(e.FileName); if (fileName!="") { string[] content = File.ReadAllLines(e.FileName); if (Regex.IsMatch(content[content.Length - 2], @"^_\d*\$", RegexOptions.Multiline)) File.WriteAllLines(@"c:\test" + fileName, content); } or that Armentrout lied. And after the state court's findings were overturned on appeal, he had the burden to prove his innocence. Is that enough to show that his conviction was wrongful? Depends on the facts. If you look at the record, you'll see that Armentrout lied on the stand and that she lied to the grand jury. If you look at the transcript of the original trial, you'll see that Armentrout was present at the lineup and was the most plausible suspect. She was a medical doctor who worked at a school with a girl who allegedly had been assaulted. If you're skeptical about the state court's finding that he didn't suffer prejudice, well, you need to talk to a lawyer and get more evidence, because you need to know whether you have a good defense, and that means finding the evidence that the prosecution didn't share with the defense. I do not want to end on an accusatory note. I am not accusing anyone of any specific crime, except for Don Schlitz, who I believe died for being a liar. I am not accusing the prosecutors or the cops or any of the judges of specific crimes, except for the ones who prosecuted or involved in the investigation. I'm saying that if you want to be believed, then you really have to do more than be famous or like yourself, or you really have to earn your reputation in court. The police and the lawyers of Los Angeles County have the reputation of being dishonest and racist. And they will say, "Oh, I didn't know that. It's not my fault. I'm not like that." And you will believe that f678ea9f9e
